 CL24

### **Operating Instructions for CL24**

CL24 is a battery operated LED lantern which gives excellent light output and a long operating time from the sealed lead/acid batteries within.

There are two operating modes which have

1. high light output, and
2. a reduced output which extends the operating time

The operating switch activates these modes by successively pressing the operating button.

First press – Maximum output

Second press – reduced output

Third press - Off

CL24 has a handle for carrying, which includes a pivoted hook to hang the lantern, and a compass for direction finding.

It is recommended that the battery be charged before first using the lantern, to ensure that the battery is fully charged

### **Battery Charging Directions**

The internal long life batteries are ideally to be kept charged to preserve the battery capacity and life.

During periods of inactivity it is essential that the charging cycle be performed at least monthly to ensure that the lead/acid batteries do not permanently deteriorate due to internal chemical reactions.

Charging can be performed by either activation of the internal charging circuit from the mains power supply or from a 12V vehicle accessory outlet.

Simply plug in the connector at the end of the Plug pack output lead, or the similar plug on the vehicle accessory lead, to the charging socket on the lantern.

The charging socket is located beneath the operating switch.

Note: the lantern cannot be operated when the charging cycle is being performed.

There is an indication of "Charge in progress" by a red indicator located above the operating switch.

When charging is complete this indicator will no longer be illuminated, and the lantern is again ready for use.

When charging the battery using the mains supply adaptor it is advisable to allow an overnight charging period. The mains adaptor will not overcharge the battery since it will automatically terminate charging when the battery is fully charged.

Similarly the vehicle accessory lead can be connected to the lantern until the charge indicator is extinguished.

With due care and regular charging your CL24 will give years of excellent service.

## WARRANTY

Arlec guarantees this product in accordance with the Australian Consumer Law.

Arlec also warrants to the original first purchaser of this product ("you") from a retailer that this product will be free of defects in materials and workmanship for a period of 12 months from the date of purchase; provided the product is not used other than for the purpose, or in a manner not within the scope of the recommendations and limitations, specified by Arlec, is new and not damaged at the time of purchase, has not been subjected to abuse, misuse, neglect or damage, has not been modified or repaired without the approval of Arlec and has not been used for commercial purposes ("Warranty").

If you wish to claim on the Warranty, you must, at your own expense, return the product, and provide proof of original purchase and your name, address and telephone number, to Arlec at the address below or the retailer from whom you originally purchased the product within 12 months from the date of purchase.

Arlec will (or authorise the retailer to) assess any claim you may make on the Warranty in the above manner and if, in Arlec's reasonable opinion, the Warranty applies, Arlec will at its own option and expense (or authorise the retailer to) replace the product with the same or similar product or repair the product and return it to you or refund the price you paid for the product. Arlec will bear its own expenses of doing those things, and you must bear any other expenses of claiming on the Warranty.

The Warranty is in addition to other rights and remedies you may have under a law in relation to the product to which the Warranty relates.

Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.
