MAINTENANCE (CONT)

steel, then, use a sponge to rinse the finish with clean water and wipe dry if necessary. Follow polish lines.

Do not use solvents or abrasive cleaners on any part of your light.

To clean the stubborn stains and discolouration on all finishes, use mild cleaning solutions as well as a rag, and a sponge or fibre brush (soft nylon or natural bristle. You can also use an old toothbrush).

Then, rinse it well with clean water and wipe dry. Follow polish lines.

Replace any cracked protective shield. In the event of a cracked or broken front glass lens, please remove the lantern or replace the glass lens (Arlec Part Number SS2309 for the Top bezel and glass and SS2310 for the Bottom Bezel and glass) as soon as possible.

WARRANTY

Arlec guarantees this product in accordance with the Australian Consumer Law.

Arlec also warrants to the original first purchaser of this product ("you") from a retailer that this product will be free of defects in materials and workmanship for a period of 12 months from the date of purchase; provided the product is not used other than for the purpose, or in a manner not within the scope of the recommendations and limitations, specified by Arlec, is new and not damaged at the time of purchase, has not been subjected to abuse, misuse, neglect or damage, has not been modified or repaired without the approval of Arlec and has not been used for commercial purposes ("Warranty").

If you wish to claim on the Warranty, you must, at your own expense, return the product, and provide proof of original purchase and your name, address and telephone number, to Arlec at the address below or the retailer from whom you originally purchased the product within 12 months from the date of purchase.

Arlec will (or authorise the retailer to) assess any claim you may make on the Warranty in the above manner and if, in Arlec’s reasonable opinion, the Warranty applies, Arlec will at its own option and expense (or authorise the retailer to) replace the product with the same or similar product or repair the product and return it to you or refund the price you paid for the product. Arlec will bear its own expenses of doing those things, and you must bear any other expenses of claiming on the Warranty.

The Warranty is in addition to other rights and remedies you may have under a law in relation to the product to which the Warranty relates.

Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.

INTRODUCTION

The 'Oberon' Stainless Steel Wall Light is suitable for permanent use and must be installed by a licensed electrician.

The lamp housing consists of a tubular, marine grade stainless steel body, each side in two parts—a bezel and support section. The support sections are in turn fixed to a mounting base. Make sure that the UP side bezel which has internal thread is attached to the UP side support section which has external thread, and the DOWN side bezel which has external thread is attached to the DOWN side support section which has internal thread. (Refer Fig1)

INSTALLATION

Place the mounting base over the position for mounting and mark the screw holes. Use the two mounting holes on the surface of the mounting base and ensure the “UP” marking points upward. Drill suitable holes, and then feed the supply cable through the rubber seal on the rear of the mounting base. Before fixing the mounting base in place, seal any holes in the wall through which the supply cable passes so as to weatherproof it. Secure mounting base with supplied screws, again ensuring the “UP” marking is pointed upwards. (Refer Fig.2)

The terminal block wired to the rear of the light must be wired to the switched active, neutral and earth of the lighting circuit to which it is being connected. Connect in accordance with Fig.3.

SETTING UP

Fix the bulb by unscrewing the front bezels of the lampholders and inserting bulbs. (Bulb is GU10 type halogen bulb, rated 250V 35W max.). The bulbs lock in place with a 1/8 twists clockwise and then refit the front bezels

This product is suitable for permanent use. The globes shall not be directed at, nor placed near any object within 0.5m from the front of the lamp.

BULB REPLACEMENT

Use only bulbs of same type and rating. (Bulbs are GU10 type halogen bulb, rated 250V 35W max.). If the light has been working, allow to cool before handling to replace a bulb.

Remove bulb by unscrewing front bezel and twisting bulb 1/8 turn anticlockwise. It should then pull out from the lampholder.

MAINTENANCE

To avoid dust build up wipe lightly with a damp cloth as required.

Clean the stainless steel at least 2 times per year with a soft cloth and a neutral detergent in order to avoid corrosion. This amount should change to 4 times per year in coastal and industrial areas.

Care should be taken when cleaning to prevent scratching. A soft cloth or fine-hair brush should be used together with a non-abrasive cleaner.

Use soap or mild detergents and water (preferably warm water) in order to clean the finish on the surface of the stainless steel...
