

Packaging Policy

Arlec Unit Trust has, as an importer and distributor of packaged domestic goods into the Australian market, a responsibility to contribute to a more sustainable society, therefore, as a signatory to the Australian Packaging Covenant, Arlec Unit Trust is committed to encouraging our Suppliers to adopt a waste minimization attitude toward the packaging of our products. This may be achieved by both the packaging design and materials chosen to produce the product packaging. The increased use of recyclable materials as well as liaising with Suppliers to reduce resource consumption, waste and pollution in the manufacture of the packaging will contribute greatly to this ideal. Arlec Unit Trust will take an active role by reviewing our product packaging both current and proposed and by liaising with our Suppliers to try to minimize the amount of potential waste material and resources used in producing the product packaging.

All the company's management and staff extend their full and unqualified support to this policy and commit to meet or exceed the expectations of Arlec Unit Trust's current Australian Packaging Covenant Action Plan.

Approved by Balu Jega Managing Director ARLEC UNIT TRUST August 2020
